AI & Cloud Computing Specialist | DevOps Enthusiast | Technical Problem Solver

</div>

About Me

Driven AI and Cloud Computing enthusiast with a proven track record in enterprise-level technical support and cloud infrastructure design. Currently pursuing **MSc Cloud Computing with Industry** at University of Leicester whilst expanding expertise in DevOps, systems engineering, and machine learning. Passionate about leveraging cutting-edge technologies to solve real-world problems and deliver measurable business impact.

Professional Experience

Associate Technical Analyst - AstraZeneca

Computacenter | July 2024 – September 2025

- **Incident Management:** Led end-to-end incident handling including detection, prioritization, escalation, and resolution whilst minimizing downtime and maintaining SLA targets
- **Real-Time Monitoring & Analytics:** Monitored KPI dashboards tracking call volume, customer sentiment, and resolution rates to drive data-informed operational decisions
- **Tools & Technologies:** Proficient in ServiceNow, SCCM, and Genesys for comprehensive IT service management and customer interaction
- **Stakeholder Engagement:** Bridged technical teams and business stakeholders,

ensuring technological solutions aligned with organisational goals

Associate Technical Analyst Internship

Computacenter | February 2024 – June 2024

- Developed expertise in networking, communication protocols, and hardware/software troubleshooting
- Mastered Microsoft tools and technical support workflows
- Gained practical experience in data interpretation and solution recommendation

 Key Achievements

- ✔ **Pre-Placement Recognition** – Selected as Pre-Placement Candidate during B.Tech Semester 8 based on academic performance and technical potential
- ✔ **Top 32 Final-Year Project Award** – Heart Disease Prediction using Machine Learning recognised among the best university projects with formal felicitation
- ✔ **Leadership Excellence** – Lead vocalist and team coordinator of independent music band; won multiple intercollege competitions demonstrating strong leadership and collaboration skills

 Technical Skills

<table>
<tr>
<td>

Cloud & Infrastructure

- AWS (VPC, EC2, Security Groups, NAT Gateway)
- Docker & Containerisation
- Kubernetes Orchestration
- Infrastructure as Code

</td>

<td>

DevOps & Tools

- ServiceNow & Incident Management
- SCCM (Systems Management)
- Genesys (Communication)
- CI/CD Pipelines
- Git & Version Control

</td>

</tr>

<tr>

<td>

Programming & Development

- Python Programming
- Front-End (HTML, CSS, JavaScript)
- MongoDB & NoSQL
- MySQL & Databases
- Groovy Scripting

</td>

<td>

Data & AI

- Machine Learning Algorithms
- Data Analysis & Interpretation
- Statistical Modelling
- Predictive Analytics
- Data Visualisation

</td>

</tr>

```
<tr>
<td colspan="2">
```

Systems & Design

- Systems Engineering & Design
- UI/UX Principles
- Technical Architecture
- Network Troubleshooting & Support
- Agile Development Methodology

```
</td>
</tr>
</table>
```

 Education

Qualification	Institution	Duration	Status
MSc Cloud Computing with Industry	University of Leicester, UK	Sep 2025 – Sep 2027	In Progress
B.Tech Computer Science & Engineering	Presidency University, India	Sep 2020 – Sep 2024	Completed
Intermediate (MPC)	St Clarets PU College, India	June 2018 – June 2020	Completed

 Featured Projects

 Cloud System & Distributed Whiteboard Application

MSc Cloud Computing | AWS, Kubernetes, Docker, Redis

Designed and deployed a secure, scalable AWS-based private cloud infrastructure:

- **Architecture:** VPC with public/private subnets, NAT Gateway, Security Groups, and

multi-node EC2 instances

- **Containerisation:** Implemented Kubernetes cluster with Docker for orchestration
- **Real-Time Sync:** Redis configuration for shared state consistency and multi-user collaboration
- **Infrastructure as Code:** Automated provisioning via AWS CLI for reproducible deployments
- **Key Achievements:** Enabled fault tolerance, pod replication, and scalable operations

[View Repository](#) | [Documentation](#)

Global Mental Health Dashboard

MSc Cloud Computing | Agile Cloud Automation Team Lead

Led a team of 6 to design and implement a comprehensive mental health monitoring platform:

- **Technology Stack:** Groovy, MongoDB Atlas, JSON datasets, interactive visualizations
- **Functionality:** Real-time global mental health trend analysis with regional depression rate tracking
- **Cloud Integration:** Leveraged MongoDB Atlas for scalable cloud storage and live performance metrics
- **Leadership:** Team coordination for Agile development with evolving data volume management
- **Course:** Mini-project for Agile Cloud Automation (MSc Semester 1)

[View Repository](#) | [Live Dashboard](#)

Heart Disease Prediction System

B.Tech Final Year Project | Machine Learning & AI

Developed an intelligent prediction system for heart disease diagnosis:

- **ML Algorithms:** Implemented and compared multiple machine learning models for

accuracy optimisation

- **Objective:** Create efficient early diagnosis tool and raise awareness about disease prevention
- **Impact:** Recognised in Top 32 Final-Year Projects with formal university felicitation
- **Methodologies:** Applied supervised learning, model evaluation, and performance benchmarking

[View Repository](#) | [Research Paper](#)

Certifications & Professional Development

-  **Python Programming** – Industry-standard competency
-  **Agile Software Development** – Scrum & Kanban methodologies
-  **Cloud Computing** – Core cloud architecture principles
-  **DevOps Foundation** – CI/CD and infrastructure automation
-  **Agile Technologies** – Modern development practices
-  **Effective Communication** – Technical presentation & documentation

Soft Skills & Competencies

Skill	Proficiency	Evidence
Communication & Presentation	★★★★★	Technical reports, peer presentations, stakeholder management
Teamwork & Collaboration	★★★★★	Team lead on Global Health Dashboard project (6-person team)
Leadership	★★★★★	Band lead; project coordination; team management
Problem Solving	★★★★★	Incident management; technical troubleshooting; system design
Adaptability &	★★★★★	Quick adoption of MongoDB, Kubernetes,

Learning		AWS; self-directed learning
Time Management	★★★★★	Balanced academic work, internships, and multiple projects

Languages

- **English** – Professional fluency
- **Hindi** – Fluent
- **Kannada** – Fluent

GitHub Statistics

<!-- You can add GitHub stats cards here -->

More repositories and contributions coming soon as I showcase my cloud computing and DevOps projects from my MSc programme.

Beyond Code

When I'm not architecting cloud solutions, you'll find me:

-  Performing as lead vocalist of an independent music band
-  Winning intercollege competitions and live musical events
-  Staying ahead of the curve with emerging technologies
-  Contributing to open-source cloud and DevOps projects

Get In Touch

I'm always interested in collaborating on innovative cloud solutions, DevOps automation, and AI/ML projects. Feel free to reach out:
